COLLECTION

What happens when you're drawing inspiration from the 30s Art Deco style and mixing it with the design aesthetic from the 60s? Simple geometric shapes, smooth lines, transitions and angles, and, most importantly, unrestrained imagination and a creative way of thought.

Art Deco style itself is often described as a pastiche of styles and an eclectic combination of influences, materials, and shapes. And we mix Art Deco with 60s design. Humour and derision are invited in a piece of furniture that aims to adapt to the body and a community lifestyle. Famous examples are Olivier Mourgue, Eero Aarnio, Vico Magistretti, and Dieter Rams.

This collection of furniture and accessories will suit creators, dreamers, and trendsetters. Outstanding manufacturing quality, original premium materials, and texture that have been rigorously selected. All this will transform any space into an exquisite and original one, highlight the impeccable taste and become the perfect complement to the story you want to tell.

The COMO collection assumes non-standard solutions. Therefore, you can perfectly fit it into an individual project. We will develop an exclusive design using products from the collection.

The collection contains over 30 items.
Get inspired and be original in everything!
