COLLECTION

## What is VERON?

Among hundreds of thousands of identical designs and repeated stories, we wanted to tell our special one. One that is not like anything. The key ideas and values of this collection are uniqueness, originality, and individuality.

In the hustle, we forget what it means to be different from others. The design of the items in this collection fills any space with the spirit of originality and individuality.

VERON is complex shapes, original design solutions, exclusive materials. It is a combination of character and current trends. You will not remain apathetic because this collection is personality.

And this personality is a reflection if you feel it. Express what you have wanted for a long time, surround yourself with objects similar to you. You are an individual, you are unique, and you are original. And we will emphasize this with the status collection VERON. We created it for those who are tired of monotony in this segment.

The collection contains over 30 items. It is possible to execute non-standard solutions from this collection for an individual project. As well we can do unique design projects using products from our collection.
